Reasons for Allowance

1. The following is an examiner's statement of reasons for allowance:

The present invention is directed to a method for determining the dimensional structure of a nucleic acid comprising: a) providing a chimeric version of the nucleic acid having at least one modified subunit in a preselected position of the chimera; b) ionizing the nucleic acid hybrid in a mass spectrometer to provide one or more ions of the chimera; c) fragmenting at least one of the ions; d) collecting fragmentation data from the fragmentation; and e) relating the fragmentation data to the three dimensional structure.

Although, Crooke et al. (U.S. Patent 6,329,146 B1) (December 11, 2001) teaches a method for determining the dimensional structure of a nucleic acid comprising: a) providing a chimeric version of the nucleic acid having at least one modified subunit in a preselected position of the chimera; b) ionizing the nucleic acid hybrid in a mass spectrometer to provide one or more ions of the chimera; c) fragmenting at least one of the ions; d) collecting fragmentation data from the fragmentation; and e) relating the fragmentation data to the three dimensional structure, U.S. Patent 6,329,146 B1 is not a prior art in view of the terminal disclaimer submitted by the applicant on January 17, 2003.

In view of the absence of either teaching or suggestion of such a method for determining the dimensional structure of a nucleic acid comprising: a) providing a chimeric version of the nucleic acid having at least one modified subunit in a preselected position of the chimera; b) ionizing the nucleic acid hybrid in a mass spectrometer to provide one or more ions of the

chimera; c) fragmenting at least one of the ions; d) collecting fragmentation data from the fragmentation; and e) relating the fragmentation data to the three dimensional structure, the present invention is novel and non-obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Arun Chakrabarti, Ph.D., whose telephone number is (703) 306-5818. The examiner can normally be reached on 7:00 AM-4:30 PM from Monday to Friday. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gary Benzion, can be reached on (703) 308-1119. The fax phone number for this Group is (703) 305-7401. Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group analyst Chantae Dessau whose telephone number is (703) 605-1237.
